INTRODUCING

905ECO™

Another industry first from Weld-On®

905ECO is the first "green" solvent cement in the industry:

- Up to 15% less solvent emissions
- Significantly reduced odorous fumes than current solvent cements in the market
- Improved workplace environment for pipe installers*
- Same great performance as top performing medium-bodied, fast set PVC cements
- Patent-pending formula
- Third party "green" certification pending

* In an exposure study conducted under the supervision of a Certified Industrial Hygienist and Occupational / Environmental Health Consultant, Weld-On 905ECO was shown to contribute significantly less emissions to the work environment than commercially available standard solvent cement.
