

FAST, FLEXIBLE FIXES: WELD-ON PIPE REPAIR

Leaks never happen when it's convenient. Whether it's a cracked sprinkler line, a busted garden hose, or a pinhole in a metal pipe, unexpected failures can bring work (or home life) to a sudden halt. That's where Weld-On Pipe Repair Wrap comes in — a compact, high-performance solution designed to stop leaks fast and keep you moving forward.

Tough Where It Counts

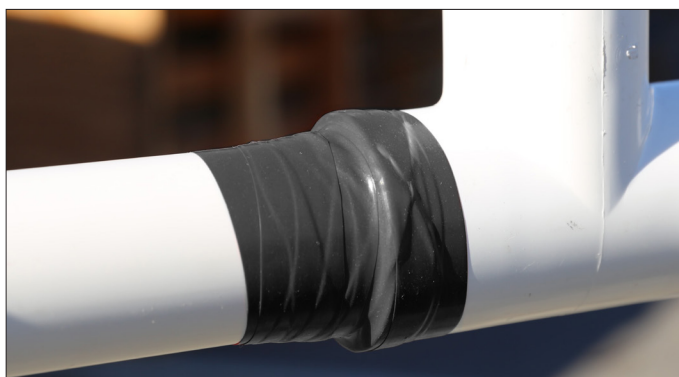

Weld-On's Pipe Repair Wrap is engineered to seal leaks in seconds, with a powerful self-fusing design that bonds to itself in less than a minute. Made for real-world conditions, it applies even to wet, dirty, or oily surfaces—a game-changer for field repairs. It's compatible with a wide range of materials including PVC, metal, rubber hoses, conduit, and irrigation lines, making it a must-have for contractors, plumbers, landscapers, and DIYers alike.

Built for Harsh Environments

This wrap doesn't just work fast—it lasts. Withstanding temperatures from -85°F to 500°F, it's ideal for both freezing conditions and high-heat applications. It's also UV resistant, waterproof, and leaves no sticky residue behind. Whether you're patching a pipe in the middle of winter or fixing a hose under the blazing sun, Weld-On's wrap is built to handle it.

Simple to Apply, Strong When It Counts

Using the wrap is as easy as peel, stretch, and wrap. Just remove the liner, tightly wrap it around the leak, and be sure to overlap the tape at least three times, extending an inch beyond the damaged area. The final wrap should completely overlap the previous layer for a secure seal. While not a permanent fix, it provides a durable temporary repair until the pipe or hose can be replaced — especially valuable for pressurized systems.

Keep One in Every Toolbox

Compact and easy to store, this 1" x 10' wrap is a smart addition to every repair kit or service truck. Whether you're on a jobsite or managing home maintenance, having Weld-On Pipe Repair Wrap on hand can save time, reduce downtime, and prevent small problems from becoming big ones.
